

## FULL STACK WEB DEVELOPER

# Chris Rowe

### PROFILE

A technology obsessed, hard worker, laser focused on maximum precision & efficiency as well as personal growth. Notable for developing workflow automation tools to reduce human error and eliminate repetitive manual tasks. Full MERN stack development certification from Georgia Institute of Technology.

Projects – Tools I have developed

- DevDr – A full-stack web application utilizing password encryption, JWT authorization, a MongoDB database, and React front end to give users the tools to build their own web projects with professional and polished UI/UX themes.
- Overdrive Automotive – a SQL database website that allows users to learn about automotive skills with detailed lessons and illustrations and quizzes that allow users to access the next lesson after completing a previous one's quiz scoring  $\geq 80\%$
- Aspect ratio & resolution size calculator – a tool for customer service representatives to examine and analyze customer files without graphic design software
- Graphic template population scripts to conditionally format user supplied data onto product templates for print (for over 30 unique products)

### SKILLS

- |            |               |                         |
