

Chris Rowe

PROFILE

A technology obsessed, hard worker, laser focused on maximum efficiency and personal growth. Notable for developing workflow automation tools to reduce human error and eliminate repetitive manual tasks. Currently undergoing MERN technology stack certification from Georgia Institute of Technology as well as certification in mobile-first responsive layouts by CSS expert Kevin Powell. Eager to tackle challenging tasks and looking to join a team that will challenge me to grow by demanding me to perform to my absolute best and beyond.

PROJECTS – TOOLS I HAVE DEVELOPED

- Aspect ratio & resolution based size calculator – Used by customer Service Representatives to examine customer files without graphic design software
- Graphic template population scripts to conditionally format user supplied data onto product templates for print (for over 30 unique products)
- Extensive library of shortcut and actions mapped to keyboard and mouse inputs
- FileMaker GUI and database for executing scripts through buttons and categories
